SUMMARY

Laravel Backend Developer with 3+ years building secure, scalable applications and APIs. Specializing in performance tuning, codebase modernization, and seamless third-party integrations. Contributor to Laravel open-source projects and community events like Laracon and Laravel Mumbai. Familiar with AI-powered development tools and automation workflows; actively exploring applications of AI in backend development and API security.

EXPERIENCE

12Grids — The CX Technology Company	Jan 2024 – Present
<i>Software Engineer Innovator</i>	
- Led design and strategy for system and database architecture to ensure scalability and maintainability. - Automated 25% of processes using CRON jobs, reducing manual efforts and boosting operational efficiency. - Refactored and optimized codebase for improved performance and reliability. - Oversaw task allocation and sprint planning across multiple ongoing projects. - Leveraged AI-assisted code tools like GitHub Copilot and Cursor to accelerate feature development and improve code quality.	
12Grids — The CX Technology Company	Mar 2022 – Dec 2023
<i>Software Engineer Innovator</i>	
- Developed and maintained APIs for iOS and Android mobile apps to support a smooth and responsive user experience. - Integrated middleware and rate limiting to enhance API security and performance. - Spearheaded improvements in deployment pipelines, reducing deployment times by 70%. - Established long-term health and stability of projects through process improvements and documentation.	

EDUCATION

S. R. M. College, Kudal	CGPA: 9.83
<i>B.Sc. Computer Science</i>	
N. A. D. Topiwalla Jr. College	64%
<i>Higher Secondary Certificate (HSC)</i>	
A. S. D. Topiwalla High School	78.6%
<i>Secondary School Certificate (SSC)</i>	

PROJECTS

example-app ★ 1k stars – short one-line description of what it does and why it matters
another-tool – a CLI that does X for Y
closed-source-thing (closed source) – internal project; describe scope, not internals
learning-project – built to learn N; one-liner about result
landing-page-clone – recreation of X landing page with modern stack
api-wrapper – minimal SDK around the X public API

OPEN SOURCE CONTRIBUTIONS

popular-repo ★ 100k stars – fix: short one-line summary of the merged PR
another-repo ★ 10k stars – feat: implement a small but useful improvement
small-repo ★ 500 stars – docs: clarify usage section

HONORS & AWARDS

Recent Award – short context (issuer, what it was for)	2026
Dean's List – CGPA range, university name	Feb 2026
Hackathon Winner – event name, placement	2025
Older Honor – one-line context	2024

TECHNICAL SKILLS

Languages & Frameworks: PHP, Laravel, MySQL, ReactJS

Databases & Tools: TablePlus, MySQL Workbench, phpMyAdmin, Git, GitHub, GitLab, Postman, Telescope, Debugbar

Deployment & Cloud: Laravel Forge, Laravel Cloud, GitHub Actions, AWS, Azure, DigitalOcean

AI Tools: Claude, ChatGPT, GitHub Copilot, Cursor, OpenAI API

Editors: VS Code, PHPStorm, Cursor

CERTIFICATIONS & VOLUNTEERING

Active contributor at **Laravel Mumbai Community**.

Event volunteer at **Laracon IN 2025** for coordination and engagement.

LANGUAGES & INTERESTS

Languages: English, Hindi, Marathi

Interests: Chess, Cooking, Streaming, Reading
