5+ Years of Experience

PROFESSIONAL SUMMARY

A Senior Front End Engineer with 5 years of experience in designing and developing user-friendly, responsive web interfaces. Specializing in HTML5, CSS3, JavaScript, and front-end frameworks, I have a proven track record of delivering high-quality solutions for complex projects, including payment gateways, responsive websites, and CMS implementations. I have worked on major projects at UPL and Nividous, excelling in creating seamless user experiences and collaborating with cross-functional teams to drive business growth and enhance digital presence.

Project 1 : - Healthrageous

Description:

Healthrageous is a US-based client project aimed at promoting health and wellness through a dynamic and engaging platform. Healthrageous is a platform that merges meal delivery with engaging health messaging for Medicare members. Healthrageous Made Easy Meals offers convenient, delicious, and healthy meal options aimed at making healthy living accessible. Rohit led the project from the frontend, managing client communication and demonstrating strong leadership skills.

Client:

Healthrageous Made Easy Meals

Technologies:

React JS

Role:

Sr. React Developer

Responsibilities:

- Led the frontend development, ensuring a user-friendly and engaging interface.
- Collaborated closely with the US client to understand and implement requirements.
- Developed responsive designs to ensure accessibility across various devices.
- Managed client communication, providing regular updates and gathering feedback.
- Implemented frontend solutions using HTML5, CSS3, JavaScript, and React JS.
- Coordinated with backend developers to integrate APIs seamlessly.
- Conducted usability testing to refine the user experience.

Project 2 : - United Phosphorous Ltd (UPL)

Description:

United Phosphorous Limited (UPL) is a leader in global food systems, reshaping the industry with OpenAg, feeding sustainable growth for all. Rohit is the team lead leading the project with his skills and leadership qualities.

Client:

UPL Limited

Technologies:

HTML, CSS, Bootstrap, JS, JQuery, PHP(Laravel Framework), MySQL DB.

Role:

Team Lead

Responsibilities:

- Led the frontend development team, managing tasks and ensuring timely delivery of project milestones.
- Designed and developed user interfaces and site structures.
- Conducted code reviews to maintain high standards of code quality and performance.
- Managed client meetings and presentations to gather requirements and provide progress updates.
- Enhanced user experience through responsive design techniques.
- Structured the site for optimal navigation and usability.

- Integrated third-party website, social media, and applications APIs.
- Implemented CMS for dynamic data entry.
- Utilized CSS animations to improve visual engagement.
- Provided leadership and mentorship to junior developers, fostering a collaborative and productive team environment.
- Coordinated with cross-functional teams to ensure seamless integration of frontend and backend functionalities.

Project 3 : - **SBI Payments**

Description:

SBI Payments Services provides solutions to merchants for facilitating merchant payments for goods and services through various form factors like Cards, QR Codes, App-based solutions (UPI P2M, YONO Sale & Cash), and Aadhar-based solutions (Bhim Aadhar SBI).

Client:

SBI Payment Services Pvt. Ltd.
